

# Confederation of Autosport Car Clubs Regulatory Bulletin

Bulletin ID	2025-001
Date Issued	May 19, 2025
Motorsport Discipline	All
Subject	Identification of Vehicles Equipped with Lithium Batteries

Effective May 13, 2025, the CACC General Competition Regulations will be amended to require all competition vehicles using lithium-ion batteries to display a decal indicating the battery's presence. This measure will aid safety marshals in responding appropriately with the additional safety requirements for this technology.

---

## General Competition Regulations Section 20.4.5

---

Vehicles using a lithium-ion battery must display the green and black Lithium Battery decal near the kill switch. Cars not requiring a kill switch using lithium-ion batteries must display the green and black decal on the top of the driver side door near the window opening. Small lithium-ion batteries that power auxiliary devices within the vehicle (radios, cameras, data acquisition, etc.) do not require the decal to be displayed on the vehicle.
